

# Proper Storage of Homeopathic Remedies

Discover the essential guidelines for safeguarding your homeopathic remedies. Learn where to store them, how to maintain the right temperature, and what to avoid to ensure the efficacy of your remedies remains intact.

---

**Location:** To preserve the integrity of your remedies, keep them away from direct sunlight, strong odours, perfumes, and liniments.

---

**Storage:** Store your remedies in a dark cupboard or drawer where they won't be exposed to excessive light.

---

**Temperature** Homeopathic medicines do not require refrigeration, but ensure they are not exposed to temperatures exceeding 30°C.

---

**Caution:** Avoid storing remedies near microwave ovens, electronic gadgets, and computers to prevent potential interference with their efficacy.
